Wrangler Fire Rehabilitation. Staff from the Richfield office have been coordinating with the BLM and UDWR to jointly rehabilitate the Wrangler Wild fire. Approximately 100 acres of trust lands was involved in this fire on Section 2, T31S, R11W, and section 36, T30S, R12W, in Beaver and Iron Counties. Seed will be flown on 100 acres followed by chaining to plant the seed. A rangeland drill may also be used on section 36 to establish a "green strip" to help control future wildfires. This project will be funded through the Utah Watershed Restoration, BLM, and trust lands will supply some seed and cultural resource survey.

20

Mineral Comments: Section 2 and 36 are mapped as Quaternary fan and pediment deposits with Quaternary alluvium in the stream drainages. There are no known mineral occurrences identified in either section. Both sections are currently held under active geothermal lease ML 50921-A which is part of an active geothermal producing unit. Even though it is unlikely that additional geothermal development will occur on either section it is recommended that the geothermal lessee be contacted and informed of the range improvements as proposed in the RIP application.

APPROVED for rehabilitation of 100 acres held within GP 22181-02 and GP 21661-01 that were burned in the 2011 Wrangler Fire. Rehabilitation will consist of flying seed onto the burned area, followed by chaining to plant the seed. A green strip will also be planted in Section 36 to help control future fires. Funding of this project will be provided by SITLA (\$2,000.00) and the Utah Watershed Restoration Initiative (\$5,000.00). See page 14 of the Director's Minutes.
